# meridianMobile for iPhone and iPad

## The future of EHR has arrived.

Imagine the rich functionality of your meridianEMR™ system combined with the mobility and fluid interactivity of your iPhone® and iPad®.

Introducing meridianMobile for iPhone and iPad—the native universal app designed for the busy Urologist. Access to your data is critical for streamlining workflow, improving patient

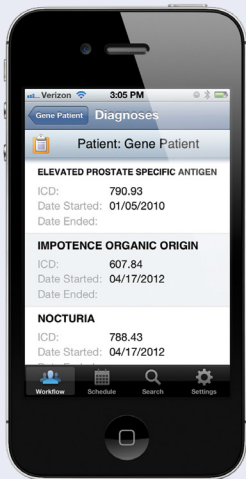

care, and making the right decisions anytime, anywhere. meridianMobile for iPhone enables you to take your EHR data with you wherever you go. Move seamlessly between the hospital or clinic, office, home, and beyond while maintaining comprehensive, convenient, and secure access to your most current EHR data.

- Tap into EHR data anywhere
- Retrieve up-to-the-minute patient information, office visits, appointments, medications, lab results, images, patient pharmacy information, medication refill alerts, patient encounters, patient photos, and more
- Hospital Rounds: quickly capture CPT, ICD, and other billing information
- Fast entry of consultation notes
- View your calendar of appointments
- Secure, HIPAA-compliant, encrypted connection
- Universal app, taking complete advantage of the full screen size and resolution for both the iPad and iPhone/iPod Touch
- Native iPhone and iPad app
- Available on the App Store<sup>SM</sup>

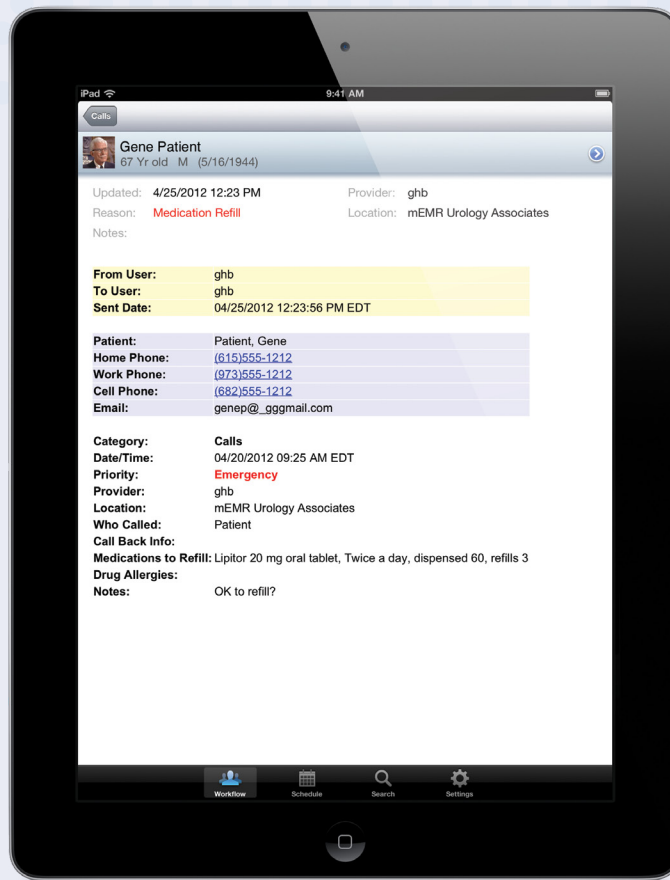

**meridianEMR lets you focus on your patients. We do the EHR work for you.**

Since meridianMobile for iPhone and iPad is a native app, it has been exclusively optimized for use on the familiar iPhone and iPad device you rely on, making the app fast, user-friendly, and powerful. Plus, there is no need to sync your device to your EHR system. Your data will be kept

up-to-date automatically. All data is stored on your office EHR. meridianMobile for iPhone and iPad efficiently exchanges current EHR data with it as required via a wireless/internet connection.
